REPLACEMENT SHEET

Serial No. 10/789,012 Filing Date: 02/27/2004

Inventor: Pullara, Sam

Atty Docket No. BEAS-01322US1

Application Side

Define Application (EJB) to Depend on One  
or More Data Sources (DS)

Deploy EJB to a (J2EE) Server, e.g.  
Weblogic, Web sphere, etc.

Server Makes Connection From Data Source  
(DS) to JNDI Name (e.g. com.bea.ds.oracle)

Connection is Kept in the Deployed EJB

Server Side

Provide Management APIs Inside Server

Define Data Sources (DS) with Respect to  
Connector Pools, JMS Queues, etc.

Provide/Associate Data Source with a JNDI  
Name That It Will Be Bound To

Associate Data Source  
With Connection Pool
